He had lectured on physics topics several times at lay's school and had proved popular as much for his entertainment value as for 'his grasp of the subject matter, which he always managed to make exciting with tantalizing glimpses inside black holes, mind-bending accounts of the first few minutes of the universe, and fantastic speculation about living in twisted spacetimes with unusual geometries. On one occasion he had introduced Feynman diagrams, which represented particles as "world lines" traversing a two-dimensional domain, one axis representing space and the other time. Mathematically and theoretically a particle going forward in time was indistinguishable from its antiparticle going backward in time, and Pernak had offered the staggering conjecture that there might be just one electron in the entire universe--repeating itself over and over by going forward as an electron and backward as a positron. At least, Pernak had pointed out, it would explain why they all had exactly the same charge and mass, which was something that nobody had ever been able to come up with a better reason for..Big sky, black and wide. And with the Mayflower H growing in the lunar sky as a symbol of it all, the dream of flying with the ship and of being a part of the crusade to secure Chiron against the Infidel became for many the ultimate ambition. The lessons of discipline and self-sacrifice that had been learned during the Lean Years served to bring the Mayflower H to completion two years ahead of its nearest rival, and so it came ' about that Bernard Fallows at the age of twenty-eight had manfully shaken his father's hand and kissed his tearful mother farewell before being blasted upward from a shuttle base in Arizona to join the lunar transporter that would bear him on the first stage of his crusade to carry the American New Order to the stars.."Leilani, honey, you're not going back there," Geneva declared. Beside him, Jay's face dropped. Then Bernard went on, "But he sure-as-hell needs someone to keep him away from those girls running all over town." He nodded at Colman, and the beginnings Of a wry grin appeared around his mouth. "Keep a good eye on him, Steve. He's crafty." He turned his head and stared resignedly at his son. There were other, more abstract reasons why it was so important for thee Chironians to be educated and enlightened, which Jay didn't fully understand, but which he accepted as being among the many mysteries that would doubtless reveal themselves in their own good time as part of the complicated business of growing up..The liquid-thick heat of the late-August sun pooled around Micky.
