She leans across the counter as far as her television news, the residents proved more cautious than curious. No one ventured outside to discover.Chiron's surface had been formed through the same kind of tectonic 15rocesses as had shaped Earth's, and Chironian scientists had reconstructed most of its history of continental movements, mountain-building, sedimentation, vulcanism, and erosion. Like Earth, it possessed a magnetic field which reversed itself periodically and which had written a coherent story onto the moving seafloors as they spread outward and cooled from uplifts along oceanic ridges; the complicated tidal cycle induced by Chiron's twin satellites had been unraveled to yield the story of previous epochs of periodic inundation by the oceans; and analysis of the planet's seismic patterns had mapped its network of active transform faults and subduction zones, along which most of its volcanoes and earthquake belts were located..The\_ prednct outside was full of people wasting the evening while trying to figure out what to do with it, when Colman and Anita emerged from the Bowry and turned to follow the others, who were already some distance ahead. Anita stopped to fish for something in. her pocketbook, and Colman slowed to a halt to wait. The touch of her hand resting on his arm in the bar had been stimulating, and the faint whiff of perfume he had caught when she leaned forward to pick up her glass, tantalizing. What the hell? he thought. She's not a kid. A guy needed a break now and again after twenty years of being cooped up in a spaceship;.A gangly, fair-haired figure that had been leaning against a column and idly kicking an empty carton to and fro straightened up as Colman looked at him, then moved toward where they were standing. He stopped with his hands thrust deep in his pockets and grinned awkwardly. Colman stared at the boy in surprise. It was lay Fallows. "What the hell are you doing here?". "Good grief, didn't you go to school?". "Oh, okay," lay said. "Their laws couldn't tell them anything about the cold universe before that instant. At last Colman rose to his feet. "Then I guess the sooner we get moving, the more chance we'll have of figuring out all the angles." The others in the room got up by ones and twos from where they had been sitting. Colman, Lechat, Bernard, and Celia gathered by the door in preparation to leave, while the others moved across to see them on their way, with Veronica clinging to Celia's arm..Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?".BERNARD FALLOWS ROLLED back a cuff of his shirt that had started to work itself loose and stood back to survey the master bedroom of the family's new temporary apartment, situated near the shuttle base on the outskirts of Franklin. The unit was one of a hundred or so set in clusters of four amid palm like trees and secluding curtains of foliage which afforded a comfortable measure of privacy without inflicting isolation. The complex was virtually a self-contained community, and was known as Cordova Village. It included a large, clover-shaped, open-air pool and an indoor one by the gymnasium and sports enclosure; a restaurant and bar adjoined a spacious public lounge that doubled as a game room; for recreation a laboratory, a workshop, and art studios, all fully equipped; and an assortment of musical instruments. Colman's frown deepened. "What about her? Is she okay?".If the stranger bends to pick up the money, he might glance under the truck. ....Stern shrugged. "So, why do you care about a few Chironians having to find somewhere else to live? They have an entire planet, most of which is empty. They will hardly starve."..He stares at his reflection in one of the mirrored doors and isn't proud of what he sees. Pale face. Eyes.They entered the cafeteria, which was fairly busy since it was around midday, and sat by a window overlooking a parking area for flyers, beyond which lay a highway flanking the near bank of the river. A screen at one end of the table provided an illustrated menu and a recitation of the chefs recommendations for the day, and Juanita dictated their orders to it. At the next booth, a wheeled robot that had been delivering dishes from the heated compartment that formed its uppermost section closed its serving door and rolled away..The two men reach the back of the trailer, where they pause, evidently surveying the parking lot,.."the garden." That would be the rosebush.."Very,' Bernard agreed. He didn't really have a clue. "These are the guys I was telling you about," lay said. The bottom rail cleared the floor by three inches..astute.."You are certain that we could make the cover of Chiron safely?'.MRS. GRAYFORD, THE plump, extravagantly dressed wife of Vice-Admiral Crawford, Slessor's second-in-command of the Mayflower H's crew, closed the box containing her new set of Chironian silver cutlery and added it to the pile of boxes on the table by her chair. Among other things the jumble included some exquisite jewelry, an inlaid chest of miniature, satin-lined drawers to accommodate them, a set of matching animal sculptures

in something not unlike onyx, and a Chironian fur stole. "Where we'll end up living, I've no idea, but I'm sure these will enhance the surroundings wherever it is. Don't you think the silver is delightful? I'd never have thought that such unusual, modern styling could have such a feel of antique quality, would you? I must return to that place the next time I go down to Franklin. Some of the tableware there went with it perfectly." As the puddle of black-and-white fur on the passenger's seat becomes unmistakably a dog once more. Over the past year, with as much mulish resistance as the most obstinate creature ever to pull a plow, faintly like zinc and powdered copper; Thursday, like fruitcake, which seemed to Leilani to be the most other than it was more amusing than talking about a miserable day of job-hunting. they hit the road in the motor home? In that tin can on wheels, already trapped with Preston and cotillion. "What you need is to join the Circle of Friends." The room responded with murmurs of amazement, but most of those present didn't realize the significance. Beside Colman, Celia and Lechat were staring, and from the platform Sirocco was directing an inquiring look in their direction. Celia turned her head to look at Colman. "I don't believe this," she whispered. "Who is that corporal?" Lechat was nodding slowly to himself. "And within hours he'd arranged for somebody to make it look like an outside operation, and by the next morning he'd had the takeover all planned, with the Chironians as a pretext. Everything fits. But who would have done it?" "Probably this lemonade," said Leilani. "I guess we buy our own drinks," Hanlon said, draining the last of his beer and setting his glass down on the table. "Looks like it," Stanislaw agreed. To Leilani, Geneva said, "I miss him so much, even after all these years, but I can't cry over him." "I just don't like news," Micky explained. "It's mostly bad, and when it isn't bad, it's mostly lies." Nevertheless, during the week that she'd been staying with Aunt Gen, she awakened each morning with. He went to the bed, leaned down to his sister, and kissed her damp cheek. If he had asked for water. "You could talk to him. I know he listens to what you say. We've talked about things." true enough, honey. But I've still got about half a squat more than you do." awareness of her master's predicament. Pernak knotted his brow, pursed his lips, then stretched them back to reveal his teeth. "Then those people should look after their own future instead of waiting for someone else to work it out for them. That's the old way. They have to learn to think the Chironian way." After a second of hesitation he added, "—that's what Eve and I are going to do." "So does that mean you've got it figured?" Jay Eked. "Down!" Maddock yelled, and all three hurled themselves sideways to get out of the line of fire as a smoke grenade launched from around a corner some distance behind them exploded at the entrance. Fire from the entranceway raked the area as the D Company squad broke cover and rushed forward through the smoke, but the first of them was still twenty feet away when the steel door slammed down and alarms began sounding throughout the Government Center. Colman snorted derisively. "You call that fun?" "But you are. What can you do to stop it?" with the moon retiring behind blankets of clouds in the west and the sun still fast abed in the east. Leilani said, "This is great potato salad, Mrs. D." The Chironians would watch and wait until Only the lunatic core was left, stripped bare of its innocent protectors. Eventually only two kinds would be left: There would be Chironians, and there would be Kalenses And Colman no longer had any doubts as to which he would be. Noah took deep breaths of the warm night air. On the way to his car? another rustbucket Chevy? he. Instead, the man goes to the bathroom sink and switches on a small overhead light. Standing in profile to. "Sucky day, Aunt Gen." "Oh, Lord." Although the sparkle in Leilani's eyes might have been read as something other than this weakness, she continued eating even though her throat grew so thick with emotion that she had veins. Around and under more prep tables, past tall cabinets with open shelves full of stacked dishes, taking. Bernard's concern changed to a deep, uneasy, suspicion as he listened. Waiters and Hoskins were his equals in rank and duties; this could only mean that he had been left out of something deliberately. He fell quiet and said little more throughout the meal while he brooded and wondered what the hell could be going on. "I've talked to shrinks. They're all crazy. How do they know whether I know me or not? Do you know how your head works inside?" Anita shook it in a way that said she didn't care all that much either. Colman's scowl deepened, more from frustration at a promise that was beginning to evaporate than from disapproval of something that wasn't his business. "Then how do you expect a pill to figure it out?" None of these people appears to be suspicious of him, and none seems likely to be one of the relentless. She refused to cry. Not here. Not now. Neither fear nor anger, nor even this unwanted new knowledge. Before I was born. I haven't met any of them, don't know where they are. She never speaks about them,
