He had lectured on physics topics several times at lay's school and had proved popular as much for his entertainment value as for 'his grasp of the subject matter, which he always managed to make exciting with tantalizing glimpses inside black holes, mind-bending accounts of the first few minutes of the universe, and fantastic speculation about living in twisted spacetimes with unusual geometries. On one occasion he had introduced Feynman diagrams, which represented particles as "world lines" traversing a two-dimensional domain, one axis representing space and the other time. Mathematically and theoretically a particle going forward in time was indistinguishable from its antiparticle going backward in time, and Pernak had offered the staggering conjecture that there might be just one electron in the entire universe--repeating itself over and over by going forward as an electron and backward as a positron. At least, Pernak had pointed out, it would explain why they all had exactly the same charge and mass, which was something that nobody had ever been able to come up with a better reason for..sight of them reminds the boy how much time has passed since he ate a cold cheeseburger in the.dinner, and she'll repay you with emotional devastation! Who ever asked me if that was what I wanted? Nobody. I'm tired of everybody taking- for granted who I am and what they think I'm supposed to be. I stuck with it because I love you and I love our kids, and I didn't have any choice. Well, now I have a choice, and this time you owe me. I say we're going to Norday, and goddamnit we're going to Norday!". "So then ... do you think I'm 'not quite right'?" he asks, fiercely gripping the edge of the counter, still half-across the table from him. "Do you have a death wish?". The pacifist laughed knowingly. When the waitress approached, he waved her away. Then he produced. "I don't explain the doctor," Leilani said. "I just quote him." "He sounds like a perfectly dreadful man,". The suggestion had served its purpose. Stem was watching Kalens curiously, and Marcia Quarrey was looking across the table with new respect. Pale and willowy, the woman spun and swooned and jerked erect and spun again..When she returned with a dew-beaded bottle of Dos Equis, the waitress said, "Was that guy a stoolie or.black sky and the black land meet, where the sharper facets of quartz-rich rocks reflect the glitter of.of The X-Files, kid.".Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colon as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeplets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks..He beams, for he and the waitress are clearly connecting now. "That's exactly right..". "Fear implies respect," Leilani said..that hand is a human ear..Lesley turned to Jarvis. "Power the tubes back up and get sop-e more guys down there fast. Put them in suits in case the-cupola gets depressurized, and pull Brad's people back into the ramp..".and she laughed with strange delight..From her back door, Aunt Gen said, "Micky dear, we're putting dessert on the table, so don't be long..".Ci repeated the performance. "Who are you?" she asked him..".Logging on early," Waiters replied. "Merrick wants to talk to you for a minute before you go off duty. He told me to tell you to stop by the ECD. You can take off now and see him on the company's time..". He moved over to the console and nodded at the array of screens. "How are we doing? Lots of wild and exciting things happening?". "Classified information," Colman murmured. Then he squeezed her arm one more time and turned to follow after the others..".I'm still with you..".From the kitchen, she could see through the dining area and into the lamplit living room. Her mother.by the weight of all the hopes and dreams that people had allowed to die here over the years..".Oh, so it's trouble them fellas is looking for, is it?" a voice with just a hint :of an Irish brogue asked softly from the doorway. Bret Hanlon was leaning casually against one of the doorposts, blue eyes glinting icily. His huge shoulders seeming almost to reach the other side of the door. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. For a few seconds that dragged like minutes, the charge in the room crackled at flashpoint. Nobody moved..but fear for her one good hand caused her to choose the nether end..".This was nice. Quiet. "But . . . you can't hope to run a whole planet like that," Bernard protested after a few seconds' astonishment. "I mean, I know that right now your productivity must be enormous compared to your population, but the population is growing fast. You've got to start thinking about some kind of . . . system to regulate things. Your resources are only finite..".No longer panting, the dog slips past Curtis, brushing his leg. Evidently the dark room holds nothing.The driver and his partner return to the cab of the truck. One door slams, then the other..".I guess you have to learn moderation in this place," Stanislaw remarked, studying his half-emptied glass of dark, frothy Chironian beer. He shook his head slowly. "You know, this sounds crazy but sometimes I wish they would make us pay for it..".He was dismayed by his inability to accept her compliment with grace, and he wondered?though not."Really? You don't look like you've been raised in a box..".Bernard shrugged helplessly. "I know. It's a chance-but what else is there?". "It's been kind of. . . an unorthodox operation..".Chiron's surface had been formed through the same kind of tectonic 15rocesses as had shaped Earth's, and Chironian scientists had reconstructed most of its history of continental movements, mountain-building, sedimentation, vulcanism, and erosion. Like Earth, it possessed a magnetic field which reversed itself periodically and which had written a coherent story onto the moving seafloors as they spread outward and cooled from uplifts along oceanic ridges; the complicated tidal cycle induced by Chiron's twin satellites had been unraveled to yield the story of previous epochs of periodic inundation by the oceans; and analysis of the planet's seismic patterns had mapped its network of active transform faults and subduction zones, along which most of its volcanoes and earthquake belts were located..".You mean the way's clear right down to the Battle Module?"
